

HDTV Connections

Your BFG graphics card supports the connection of an HDTV ready television. Connect the included HDTV breakout cable to the 10-pin connector on your BFG graphics card as shown (figure 1). Then connect the HDTV component outputs (figure 2) to your HDTV-ready television component inputs using component extension cables (not supplied). You may also use the DVI connection (see figure 1) on the video card rear bracket provided your television supports it and you have obtained the proper DVI cable for your television.

For detailed driver settings refer to: "Graphics Display Property Users Guide" Which is available from NVIDIA here: http://download.nvidia.com/Windows/66.93/66.93_ForceWare_Release_65_Graphics_Display_Property_Users_Guide.pdf **NOTE: CONFIGURING HDTV starts on PAGE 95 of the User's Guide.**

If you have any installation problems please contact our technical support which is available 24 hrs 7 days a week. In the US and Canada call toll-free 1-866-BFG-FIXX (234-3499). Outside the US call (toll call, charges apply) 00 + 1-630-637-2459. E-mail: support@bfgtech.com
